PROFESSIONAL SUMMARY

Motivated and detail-oriented Junior Frontend Developer with hands-on experience building responsive web interfaces using HTML, CSS, Tailwind CSS, and JavaScript fundamentals. Currently developing practical software development skills through professional training, personal projects, and continuous learning.

Familiar with Git, GitHub, responsive design, Flexbox, CSS Grid, media queries, and Vercel deployment. Passionate about creating clean, responsive, and user-friendly digital experiences, with growing interests in UI/UX design, web applications, and product development. Seeking an entry-level opportunity to contribute to a development team while continuing to grow as a software professional.

TECHNICAL SKILLS

Frontend Development

HTML5 • CSS3 • Tailwind CSS •

JavaScript Fundamentals

Responsive Web Design • Flexbox •

CSS Grid • Media Queries

Tools & Development

Git • GitHub • Vercel • Visual

Studio Code

Design & Problem Solving

Basic UI/UX Design • User-focused

Interface Design

Problem Solving • Product Thinking

EXPERIENCE

Cephas ICT Hub — Software Development Trainee / SIWES

July 2026 – Present

- Developed structured and responsive web pages using HTML and CSS.
- Created web forms and page layouts following modern web development practices.
- Applied CSS techniques including Flexbox, Grid, positioning, spacing, borders, and responsive layouts.
- Built practical projects using HTML, CSS, and Tailwind CSS.
- Implemented responsive interfaces for mobile, tablet, and desktop screen sizes.
- Used Git and GitHub for source control and project management.
- Practiced deploying web projects using Vercel.
- Developed foundational JavaScript knowledge covering variables, data types, functions, loops, arrays, operators, and basic DOM interaction.
- Participated in problem-solving activities focused on identifying real-world challenges and exploring technology-based solutions.
- Continuously improved development skills through hands-on exercises and personal projects.

PROJECTS

Study Match — In Progress

Student Collaboration Platform

A platform concept designed to help students find suitable study partners or groups based on courses, academic level, schedules, and study preferences.

Focus: Product Research, Problem Analysis, UI/UX Planning, Frontend Development

- Exploring a technology-based solution to student collaboration challenges.
- Planning user-focused features around study partner matching and collaboration.
- Applying UI/UX principles to structure the product experience.
- Developing the platform incrementally while strengthening frontend development skills.

Personal Portfolio Website — In Progress

Frontend Development Project

A personal portfolio website designed to showcase my development skills, projects, experience, and professional background.

Technologies: HTML, CSS

- Building a responsive portfolio layout for desktop and mobile devices.
- Creating sections for professional information, skills, projects, experience, and contact details.
- Applying responsive design and user-friendly navigation principles.
- Continuously improving the website as my development skills and projects grow.

EDUCATION

Ladoke Akintola University of Technology (LAUTECH)

Ogbomoso, Oyo State, Nigeria

B.Tech. Information Systems

Expected Graduation: 2028

PROFESSIONAL STRENGTHS

Problem Solving • Continuous Learning • Adaptability • Team Collaboration • Creativity • Attention to Detail • Communication • Growth Mindset

CAREER INTERESTS

Frontend Development • Software Development • UI/UX Design • Web Applications • Product Development • Technology & Innovation
